The Tableau Desktop Specialist certification is an entry-level credential that assesses foundational skills in Tableau Desktop, including connecting to and preparing data, exploring and analyzing data, and sharing insights. The exam typically consists of 30 multiple-choice questions to be completed within 60 minutes, with a passing score threshold around 70%. However, the quality and comprehensiveness of these free practice exams vary widely. Some platforms offer well-structured, up-to-date questions that mirror the official exam's difficulty level and subject distribution. Others may present outdated or overly simplistic questions that do not adequately prepare candidates for the actual certification test.
